1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Shekleton on 09 December 2008.

The application has been amended as follows: Claim 1, line 13, after "direction" insert --both parallel and perpendicular to the direction of reciprocal movement--, line 14, delete "and in a direction perpendicular to the direction of the rotary drive shaft".

Claim 2, line 2, insert between "direction" and "of" the following: --of reciprocal movement--.

2. The following is an examiner's statement of reasons for allowance: the prior art of record does not disclose or fairly teach a retainer ring that moves in directions both parallel and perpendicular to the direction of movement of the head body shaft to maintain a gap between the retainer ring and chuck within a predetermined range during the polishing operation. The closest art of record, to Jackson et al, 5,643,061, discloses only movement of the ring in one direction.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
